RE: Greenport Retail Development
Route 9
Greenport, Columbia County

Dear Mr. Marzocchi:

The Department has completed a conceptual review of the plans you submitted for the improvements to Route 9, as well as the Traffic Impact Study, associated with the subject project. The plans that we reviewed are drawing number C150 thru C154. They show a proposed traffic signal at the intersection Josten Boulevard and the northern access drive, the widening of Route 9 to provide a third lane for left turns along the entire project limits, a mid-point access drive (left turns out prohibited) and a southern signalized access drive. We feel this plan is acceptable and adequate and addresses the Department's concerns regarding the traffic impact associated with this development.

A detailed engineering review will be done during the Highway Work Permit process.

If you have any questions, please contact me at (845) 575-6040.

Very truly yours,

Glenn T. Boucher
Region Highway Work Permit Coordinator
